Good understanding of Javascript, HTML, and CSS is expected.What You Will Learn* Create, reuse, and compose React components using JSX* Share data between various React components and techniques for data flow within a React app* Handle user interactions with the help of event handlers and dynamic components* Set up and use various next generation ES2015/ES6 features with React* Understand the performance and immutability features of React using React add-ons* Learn the techniques of Animation in React* Use data stores to store model-related data and information* Create a flux-based React application by using Reflux libraryIn DetailReactJS is an open-source JavaScript library that brings the power of reactive programming to web applications and sites. It aims to address the challenges encountered in developing single-page applications, and is intended to help developers build large, easily scalable and changing web apps.Starting with a project on Open Library API, you will be introduced to React and JSX before moving on to learning about the life cycle of a React component. In the second project, building a multi-step wizard form, you will learn about composite dynamic components and perform DOM actions. You will also learn about building a fast search engine by exploring server-side rendering in the third project on a search engine application. Next, you will build a simple frontpage for an...
